Contents

S.No	Chapter Name	Pages
1.	Hybrid Attention-Enhanced CNN–Transformer Framework for Next-Generation Image Classification *Dr. Dipak P. Chavan*	1–14
2.	Explainable Deep Reinforcement Learning for Autonomous Decision-Making in Dynamic Environments *Mrs. D.Nisha*	15–28
3.	Federated Learning with Privacy-Preserving Mechanisms for Healthcare Data Analytics *Dr. Anup Bhange*	29–44
4.	Generative Adversarial Networks for High-Fidelity Medical Image Synthesis and Augmentation *Ms. Priyanka Gomase*	45–57
5.	Zero-Shot and Few-Shot Learning Approaches Using Large Language Models for Low-Resource Languages *Mrs. Geetha R*	58–72
6.	Graph Neural Networks for Social Network Analysis and Knowledge Graph Completion *Mr. Vorem Kishore*	73–90
7.	Edge AI Deployment: TinyML Models for Real-Time Object Detection on Resource-Constrained Devices *Dr. Chinnala Balakrishna*	91–104
8.	Multimodal AI for Emotion Recognition: Integrating Speech, Text, and Facial Expressions *Mr. Vorem Kishore*	105–120
9.	AI-Driven Predictive Analytics for Smart Agriculture: Crop Yield and Pest Detection Models *Sambu Anitha*	121–135
10.	Transformer-Based Frameworks for Automated Code Generation and Software Optimization *D. Mahitha*	136–153
11.	Adversarial Robustness in Next-Generation AI: Defense Mechanisms for Image and Text Models *Dr. Pradeep Venuthurumilli*	153–171

12. **AI-Powered Precision Medicine: Deep Learning for Genomic and Clinical Data Fusion** **172–190**
M.Asha Jyothi
13. **Unsupervised Representation Learning for Anomaly Detection in Industrial IoT Systems** **191–204**
P. V. Aparanjini Priyadarsin
14. **Trustworthy AI through Causal Inference: Enhancing Interpretability of Complex Models** **205–215**
Dr. M. Uma Devi
15. **Ethical and Sustainable AI: Frameworks for Fairness, Transparency, and Human-Centric Applications** **216–227**
Dr. B. Sarada
